## SHANTY TOWN POWER ON 24/7

**BN Agent, V**  
BPL get left in the dust with their upgrade. So sad, look at one of our haitian villages in the Mudd new upgrade. This the new state of the

art upgrade is powering there shanty town and more. Think about it the Shantytown have their own GENERATOR for the whole COMMUNITY. Say what you want buddy

their power is in, they all pool their resources together and bomb Big Boy generator in the center for everybody to use talk that! Not that we are encouraging

generator usage, but gosh look what a village can do, they got tired of the hassle and the blackouts and now their off the grid and on their own once again.

## BPL BLACKOUTS

**BN Agent, V**  
Hopefully yall can see the text clearly, because BPL cut the power off on BN so we had to create the paper today in the dark, luckily we have a backup generator and some illuminated text to help get you guys through the struggle today. Moving right along, with more chicken grease oil pork chop pickles and lemon pepper cheese. Yeah sounds confusing right? Yep, that's the same way BN felt when we heard what the PM had to say about BPL's outages.

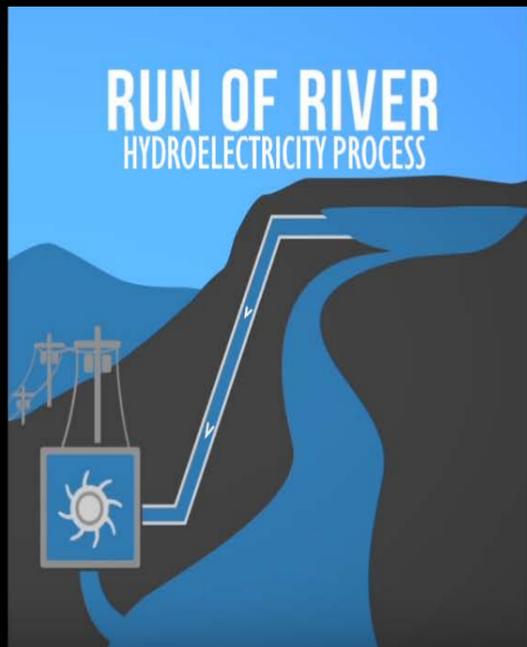

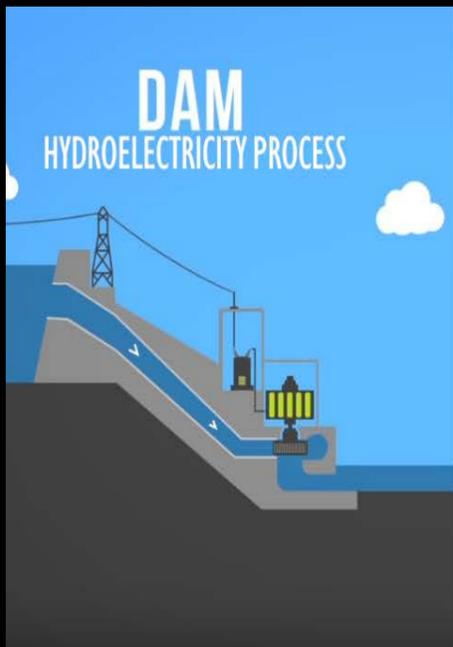

families are suffering. I fully understand that Bahamians and residents want clear and immediate action. I want to assure you that the Government is committed to doing whatever is necessary to alleviate this problem, including further additional measures. The frustration and inconvenience experienced by Bahamians and residents, in homes and in businesses throughout New Providence is simply unacceptable. We are doing all we can to fix this problem long-term, and to ensure that Bahamians and residents receive the consistent power supply that they deserve. Work has already begun on a 132-megawatt power

plant in New Providence as a part of that long-term solution." Are we going back in time? A 132-megawatt power plant, sounds like were just heading more and more back in time and back to the caring about fossil fuels, no innovation for powering our country with modern technology, it looks as if either we will be back to bigger generators or even worst a huge Thermal power plant, Thermal will be the worst choice of them all, more air pollution and more waste of fuel (Sorry Sunshine Boys' No Pun-intended) but buying fuel by the tons to power an island is just ridiculous when there are so many forms of creating electricity.

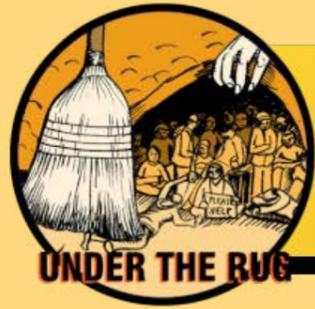

You have Wind Power Plants, Solar Power Plants, HydroElectric power plants as options rather than the same old, olden days fossil fuels burner which is Thermal power plants and generators. Remember this people in order to create electricity or energy all you need to do is get a turbine to spin or collect heat. We may not have dams to create the regular version of a hydroelectric power plant, but we sure do live on an island that has force full waves and water current flowing constantly, to recreate a new version of capturing the motion of water without having a high point to low point, but it still can be done, through dredging if we wanted to recreate or mimicking

the hydroelectric run of river power plant system. Put it like this, cities around the world are at a disadvantage of water being in motion so they had to come up with creative methods to ensure that water has motion to move the turbines, we are on an island where water rushes to shore constantly by "NATURE" and we still haven't come up with a turbine system to capture this energy that is being missed out on. TIDAL hydroelectricity plants is the only future of electricity the bahamas should be looking into, capturing WAVES to create energy. The tidal power plants industry has been getting Photo below shows an example of an idea of how we can create our TIDAL HydroElectricity

Power Plant to fit how our islands are situated, a theory that can save the future of our electricity for a lifetime. If done correctly and profected we possible convert up to 98% of electricity efficiency. Or if that's too complex we can turn to Solar panel power plant which nowadays thanks to the Indians is able to convert up to 46% of sunlight energy into electricity efficiency. While Thermal power plants are still at a whopping low 33% of energy efficiency. The lowest of them all are wind power plants that are only able to collect 25% of energy efficiency but based on the placement some Wind power plants can produce around 50% efficiency. But the most powerful of them all is HYDRO ELECTRICITY which can get a high 95% of efficiency energy. So if we are looking to create a true solution renting of generators can sustain us for a few more months but the true future in electricity is investing in the creating the perfect TIDAL HydroElectricity Power Plant for our shores.

**UNDER THE RUG**

**MUNNINGS  
ROAD  
DEATH  
STILL  
UNANSWERED**

BN Agent, X

It's been a bit over about a year since the death of Garvinisha Anastasia Carey who passed away the morning of June 18th 2018, a single mother with a loving heart, who lost her life due to no signage, street lights or reflectors on a road that was closed illegally through the desires of members of a community at the time. Since this tragic lost members of the community has been tight lipped and trying their best to keep it under the rug, but buddy we dont know how yall gone do that. But lets get to some facts on how this entire thing played out and why. Allegations of Minnis having a loved one at that time were circulating on the internet and through social media, about this sweetie, claiming that this particular women in this community, played a vital role in making the roadblock happen because she was one of the heads of the committee for the

community. BN can't say how close this woman may have been to the PM because like we said, they were online allegations, we don't know! But thats not even important, what's important is the reasoning behind the roadblock. The community first claimed that too many cars were driving through the community using the road as a shortcut, many believed that, had everyone fooled, but the truth after deep investigations, is that the community of where munnings road is situated has been putting in for a cul-de-sac hoping that it be approved by works so that they can gate their community have a security guard at the main entrance and try and race the value of the area. Well it's been a year since a women blood has been on yall hands and yall still aint get this community gated yet, what happen? Is the area to middle class and ain't enough M's behind yall bank accounts to be movers and shakers in this town. It's a crying

shame! A mother's life has been lost and several accidents happened before hers, and none of you said maybe were going about this the wrong way, we should move the road block until we get true approval from the government to do so. Remember now the death of Anastacia is why the government jumped in to try help y'all cover up the mess y'all created, the reflectors got installed by the dead end and the speed bumps and the lights AFTER the death of Anastacia, not before. So yall far in the wrong, but anyway enjoy it while it lasts, because last we heard a particular MP have homes around their and he was the one that ensured Munnings road was paved so that those homes can be easily accessible for his tenants. That MP is no longer in power, but as soon as the tide changes, we know how Bahamians go, those walls will be knocked back down and yinna community member that live in that area attached

to Munnings road, yall community will NEVER be a gated, its best yinna gate yall homes and call it a day, to much blood on yall hands. And of all the road we don't know why they name that road after Mr. Munnings, he was such a good man a real savior to a lot of the bahamians out here during his time, Percy was a legend to many a real good guy. But yes that's how the cookie is crumbling for that community, only a matter of time.

## BONGIE OF THE DAY IS AWARDED TO CASA BAHAMAS SLEEPERS

## HOW FAR ARE YOU WILLING TO GO FOR LIKES, COMMENTS & SHARES? WOULD YOU TAKE IT AS FAR AS SLEEPING ON TOP OF CASA BAHAMAS? THE ABANDONED HOTEL

**BN Agent, V**  
Well yes that's what these young guys did, the famous old hotel of Freeport, Grand Bahama, that still to this day is known as a landmark on the island, was crashed into by some young up and coming youtuber that felt that he just didn't see the need in

making a wack video to begin his YouTube stardom. So what did he do round up some friends started up his camera and got to making it look good for the camera, they even managed to buy pizza as they laid out on top a Casa Bahamas without any pillows and on the cold floor. Some people tried to say it

was a fake claiming that they didnt film their self the full night during the time warp, but who cares it was good to see a first attempt at a video for going famous to be creative, Casa Bahamas, has a lot of history and even deaths of persons that committed suicide from jumping off of the top. But in

any event the video content was cool, but yall still some bongies of the day for sleeping on that cold floor without no pillows and blankets, that's a far reach for some comments, likes, shares and a subscribe.

# COMPANIES LEFT IN STONE AGE

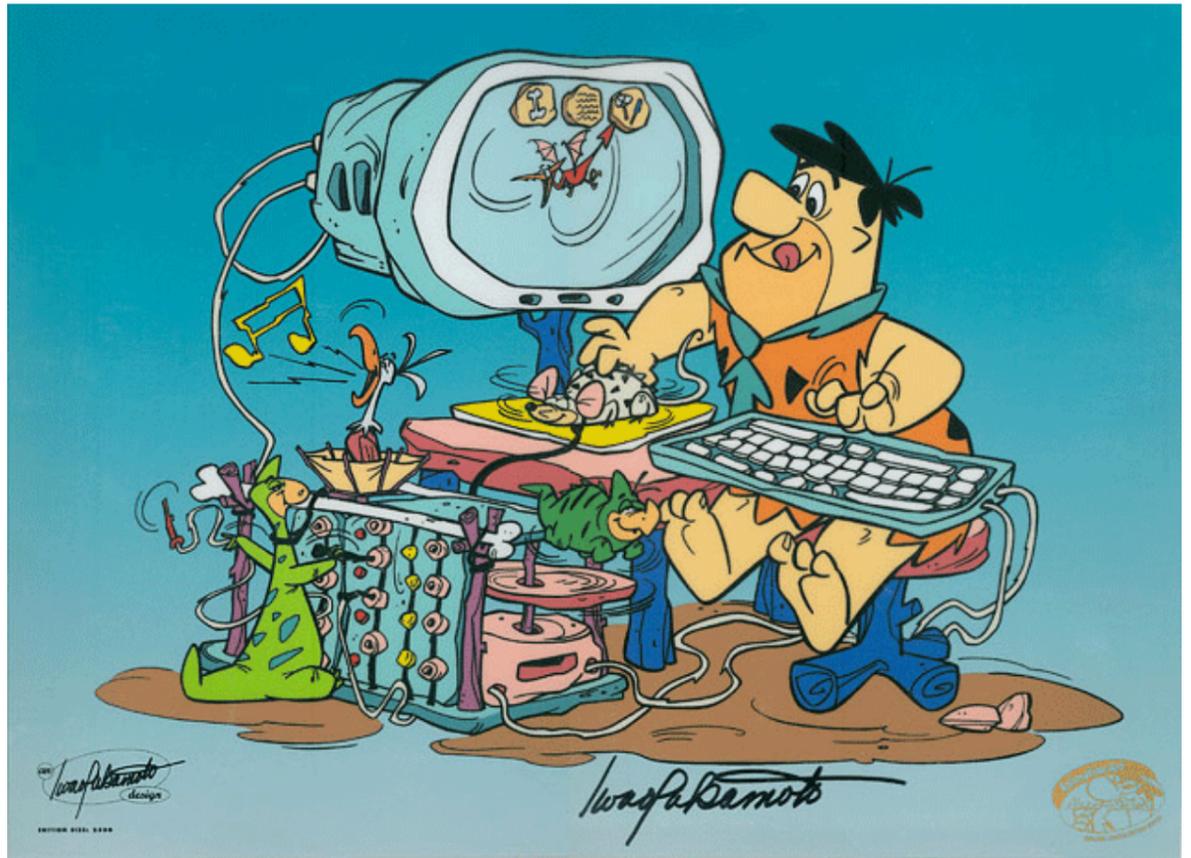

BN Agent V

Stone Age Business Concepts in 2019 In 2019, why is it that major companies in The Bahamas do not have the option for online purchasing and delivery? Sticking to the "old way" of doing things does not help our country. We live in a time where convenience is a priority. It is rather baffling to learn that millenials - I wouldn't shout about the older generations- are illiterate in regards to making online purchases. Something must be done. The days are now compact with the task of rearing children, taking care of the home, pursuing careers/degrees and running

companies. Being compelled to stop to the local grocery store should not be added to already demanding days. Think about it.. Providing online stores is another step in the 'Go Green' initiative, creates jobs and appeals to the "home bodies" who constantly argue with themselves about going to the grocery store as well as those who are thrilled with the idea of "...one less thing for me to do". While some may think that such innovation will result in job loss allow us to say No, cashiers will not be cut out as there will inevitably be in store traffic and a need for them. It's 2019 driving to the grocery store or any

store should be an option not a MUST!

YOU DONT HAVE A WEBSITE!?  
NOR ONLINE SHOPPING?

# NBA PLAYERS SHOWED LOVE

& OVER 500,000+ VIEWS

# RODNEY MONCUR GETS HIT FROM BPL!

BN Agent, V

Even Rodney ain't safe in IL studio from these load shedding demons at BPL! But dont mind that Rodney gone get yall straight in the long run, because why BPL

IS NOT SAVED! And all Minnis doing is looking into the matter, at least Perry ordered a Probe when the black outs were happening under his watch and even him play a role in why we are in this mess today from

way back then! WATCH OUT NOW THIS BN! AINT NOBODY SAVED! But in any event its your turn now MINNIS! And the people are in darkness 3 hours a DAY, EVERY DAY!

# NEW ANTI-PLASTIC LAW BRINGS HUGE FINES

BN Agent, V

New anti-plastic law set to fine citizens \$5,000 if caught releasing balloons into the air, and \$20,000 fine for business caught releasing balloons into the air. This is because of the new laws of plastic free bahamas for 2020, ban on plastic.

# BUSINESS

UNCUT!

## WENDY'S NO LOVE POLICY

**BN Agent, V**  
Have you ever went to a Wendy's in the Bahamas on a hot sunny day and went through the drive through and saw a Wendy's employee with a Palm pilot in hand taking your order? Before you give your order you would have to roll down your window before giving your order and quickly roll it back up from the sweltering sun.  
Can you imagine being the employee who is scheduled to be in the hot

sun with a smile on your face taking orders for at least 3 hours? And if a relief is not sent outside, you are then required to stand an entire shift. Wow! What if the Manager is enforcing the NO LOVE POLICY on that employee because they pissed her off?  
I understand the initial intent is to provide faster service...but does it really if the workers inside are not processing orders as quickly? WHO IS THE LABOUR OFFICER

ASSIGNED TO FAST FOOD CHAINS AND ARE THEY TAKING A SIDE-CHECK HOME to allow such BARBARIC TREATMENT?  
If Wendy's abuse of its employee is not bad enough what about the treatment of the drive through customers at the Oakes Field store who are forced to wade in water clearly while waiting to get to the girl standing in the hot sun under a half tent to place your order? Perhaps you are not a drive through customer fine enough but what about the water on the side of the drive through windows assigned for parking?  
Is this lingering water a back-up of the sewer or just a watered nesting park for mosquitoes, or perhaps a breeding facility for the next stream outbreaks of Dengue Fever? Again WHICH HEALTH INSPECTOR IS TAKING HOME A SIDE CHECK TO LOOK THE OTHER WAY?  
WHATEVER OR WHOEVER IT IS WENDY'S MAKES MILLIONS AND CAN AFFORD TO DO BETTER. BN encourages all its readers to do ask for the

Manager and complain about the Employee in the hot Sun and secondly complain about the dirty water lingering around restaurant. NOW to be effective this complaint must be made just before you pay for your order and if you forget to do it there, do it at the pick up window instead. WENDY'S MUST SHOW LOVE AND DO BETTER.

Club One Fitness Center, SandyPort Plaza | Nassau, Bahamas

BN Agent, V

**M**y name is Stephen "Durdy" Newbold, I'm a Track and Field Enthusiast/Athlete and a Bahamian Patriot. I take tremendous pride in representing our Country. I treat our colors with the upmost respect and I wear them proudly. I'm appalled to learn that with less than 1 year to go to the 2020 Summer Olympics in Tokyo, Japan there are ongoing discussions about discontinuing my subvention payments.

The past 3 years has been a rough one. In 2016 I was a part of the Bronze medal winning 4x400m relay at the Summer Olympics in Rio de Janeiro, Brazil. Obtaining this medal qualified me to receive subvention payments from the Government of the Bahamas as listed in their curriculum. There are 3 levels of payment, The first is called the Developmental level, this fund is suppose to help Athletes deemed as Olympic worthy, but I was not entered on this level when I qualified to be. The first time I learned about this

# TRACK SUPERSTAR SEEKS HELP FROM PUBLIC

level I was 19 years old and signed with Puma. What was clear to me from then on, is that someone has an agenda set out against me. How can a well renown Company such as Puma deem my accolades and efforts worthy of support before the Government I've made proud time and time again? From the ages of 19-22 I struggled with my training due to the lack of support and resources that we face everyday at home. Subsequently I was released from Puma. At that particular time I was learning the ropes of training as a Professional at home. Nonetheless I overcame it all in 2016.

The Elite level is the secondary level of payment and according to the curriculum when your performances and accolades increase so does your payment

level. I qualified for this particular level after receiving my Olympic medal, but I have never been elevated to this level and it has never been made clear why, just a one time verbal communication through a former Athletes representative. She was told that they could not elevate me to the secondary level because the Government was paying one of my teammates on this level. I take this as a slap in the face because my teammate and I both qualified for the Elite level at the same time. They chose to curry favor him and feed me scraps. This ordeal happened back in 2016, here we are in 2019 and nothing has changed. In 2012 when the Golden Knights won their Olympic Medal, who needed to be elevated were elevated. I've consistently beat

members of that team who are paid much higher than I am but yet still I'm being cheated. Currently the payments that I've been cheated with from day one, are being challenged and can be discontinued after only 3 years. I don't understand why there would be debates about my payments because I am a medalist from the 2016 Olympic Games, and a silver medalist from last years' Commonwealth Games in Gold Coast, Australia. Medals from both of these prestigious Games are prerequisites for obtaining the Subvention fund. This is why I'm confused about the discussions, because at the end of the day I've done enough to secure my spot on the Elite level, but I'm still receiving Developmental funds. But as a Professional Athlete totally at

the mercy of our Government, I feel as though my only option is to keep the Public abreast about serious situations such as the one I presented. When we travel to these meets to represent our Country, it at the expense of the Taxpayers. For example, it is not cheap to house Team Bahamas at the Olympic Games, and on top of that we are the Defending Bronze medalists. How would the tax payers feel after having to pay such an enormous bill to find out that the Government cut the funds of Medalist from the Last Games without a proper or legitimate reason? We wouldn't have much of a standing chance as a team, because it is not only my payments in discussion but other medalist as well. For almost 4 years I've been voicing that I have been cheated

and it has only been overlooked. I do not know who to ask for help or who to talk too.
