“ NEMA COLD TO EVACUEES THAT LEAVE WITH FAMILY

BN Agent, X

Lady comes on facebook live and tells truth on Government and Nema who is not allowing you to collect food or supplies if you pick your family up as an evacuee to come and live with you. This is by far the most horrible information people can receive during this crisis, so put this in your head.

You just picked up four of your family members, who are more than likely unemployed because the islands are basically waste lands at the moment. You must now house them and feed them on your own, that is difficult for the middle class and lower class, who are the vast majority of families that are picking up their affected family members. Why is this being done like this? Is it the fear of non evacuees

can sneak in and get access to the free food and cleaning supplies while pretending to be an evacuee, if so, just create a system to ensure this doesn't happen.

Airlines, ships, NEMA and others have been keeping a record of the names of every evacuee. How hard is it to create a database, the hell with a database let's make it simpler, create a google doc shareable "Excel sheet", to keep a record of every person that was evacuated. Create temporary card ID's for each person, or a

cheaper route would be just a name on the ID or spend a little more and go the non cheap route stick a photo of the evacuee on each card, use Rotary clubs or ask for assistance from the general public as volunteers to complete this process. Once each evacuee that are living with families have received their ID cards, they can now also receive food and cleaning supplies for their living accommodations during this temporary lack of housing issue.

If a process like this does not happen,

it will be extremely hard for families to be able to feed additional family members off the small salaries they are currently receiving. What happens with thousands are living hard, crime rises, so expect crime to increase in Nassau if we cant make simple fixes to ensure everyone is living slightly comfortable in this crisis.

THE GREAT LOAN WHO WILL WE BORROW FROM AND WHATS EXPECTED IN RETURN.

BN Agent, X

Jordan Chang revealed on CNN the purpose for lending billions to The Bahamas. The shocking truth is who will we receive the bag from? What bag is that you may ask? The billions to repair this 7 billion dollars worth of damages in Grand Bahama and Abaco. Will it be U.S.A. or will it be China is the real question and how much will the government give them back to compensate for such a huge loan that we still won't be able to pay back.

History has shown hundreds of undeveloped countries and third world countries that depend on bigger nations during their hard times and the results are always the same, that nation moves all of its industries into your country or even in most cases set up military bases, and create facilities that benefit off of exportation of your natural resources.

With this now being known we must look closely at the moves of our heads in this country, the wrong decision can place us in

a position where, us and our childrens, children, have to repay back debts where none of us truly benefited from. If the money is borrowed we all as a people must ensure that we make sure all of the money is used to rebuild the bahamas and not placed in the pockets of anyone for self gain, or even in companies for self gain. If you witness any of these type of deeds during this rebuilding process, speak up, because we are the only persons who will be paying back for these humongous loans. As a people we must stick together in this time of need, put politics aside and be realistic about the future of The Bahamas.

ECONOMIC HITMAN HOW THEY WORK AND WHEN.

WHEN COUNTRIES ARE IN A CRISIS THEY APPLY MORE PRESSURE AND HELP, ASKING FOR ALOT MORE IN RETURN.

BN Agent, X

For those who do not know about Economic hitman and how they work, read on. These hitmen's jobs are to convince leaders of underdeveloped countries to accept substantial development loans for large construction and engineering projects that would primarily help the richest families and local elites, rather than the poor, while making sure that these projects were contracted to foreign companies, sounds familiar?

Countries who receive these loans later would give the foreign country (the loaner) political influence and access to natural resources (fishing permits and the sort) to foreign companies. This is the role of an

"economic hit man." An example of how it would work in The Bahamas, lets just say we're in a crisis like currently with the effect of hurricane Dorian. We are already 7 billion dollars in damages, a perfect scenario in which the economic hitman prey on already. For the sake of argument let's just say if something worse happened, which causes us to increase now to 12 billion in damages. An Economic hitman would be hosting meetings everyday with our government offering loans in the billions, to repair all of the damages. If the government were to accept the loans, we would then have to repay these loans back in the many years to come, then as the money comes into the country

or appear to look as its going into the country, in reality it goes into many companies already owned by the economic hitman, which intern does the services of rebuilding back the country. So it's simple they lend us the money and use there companies to do the majority of the services of rebuilding back while we only get smaller contracts like a few thousand here and there, or a million here and there through sub contracts, but not one company in the Bahamas will receive any billion dollar contract, take it out of your head only the lender's companies will make money off of the main contracts and a few members of parliament and elite families in our country. Prime example of

this is the building of Baha Mar, the loan came from China (The China Export-Import Bank undertook the loan, but one of the conditions was that China Construction America (CCA) had to build the hotel), the construction company that created the hotel was a sub company of the same company that gave the loan, sigh. They're lending money to themselves and basically providing the countries with services, therefore the country still isn't properly getting some form of stability if the billions aren't coming to them to help pay back the major loan. Just stay woke Bahamas, we need to stick together in these hard times and not sell ourselves short.

BONGIE OF THE DAY IS AWARDED TO HALF HAITIAN STARTS WILDIN'

DIDN'T GET PICKED UP BY HOMELAND, SAYS HE IS AN AMERICAN CITIZEN.

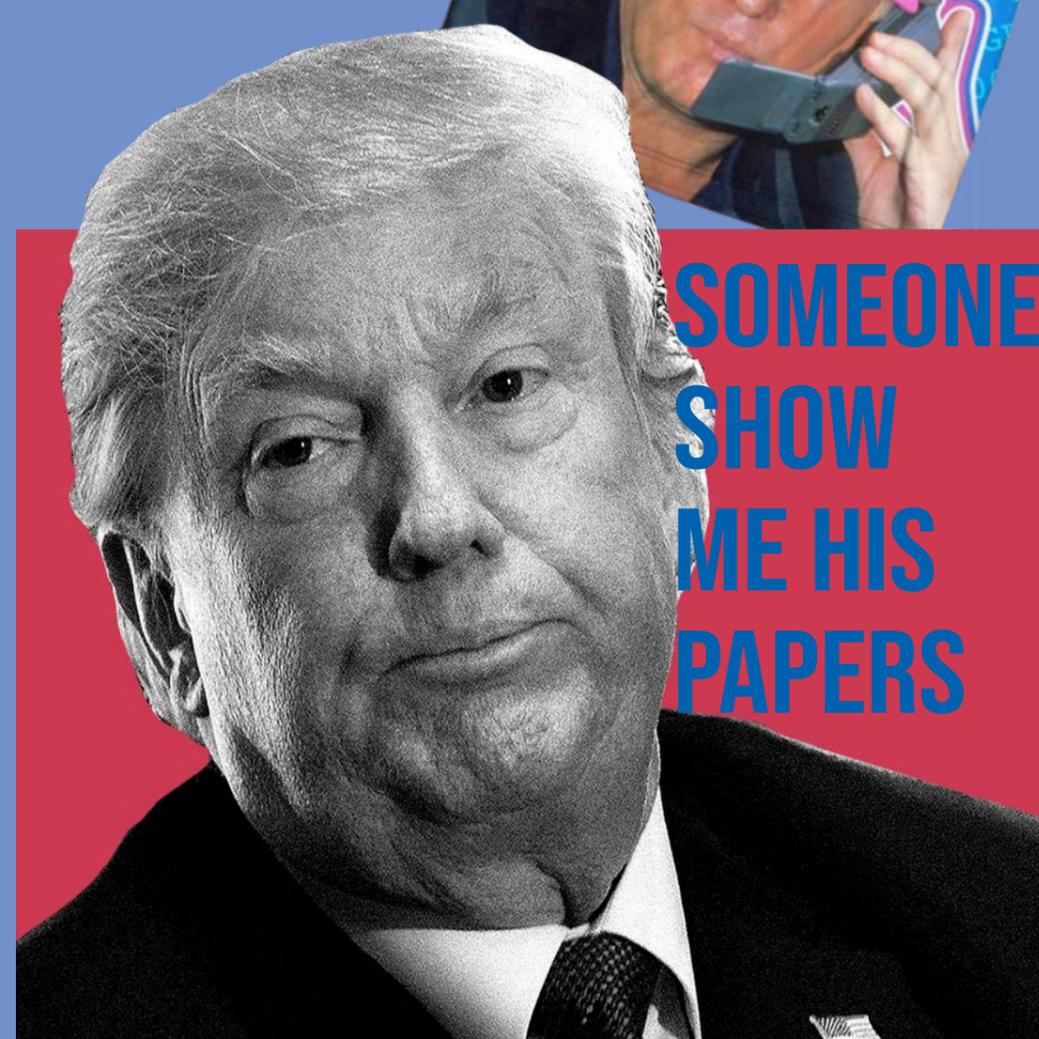

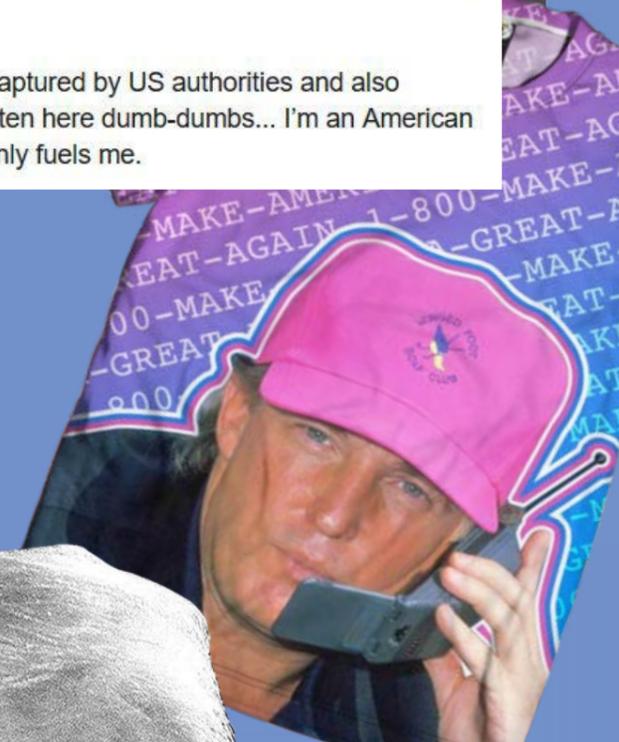

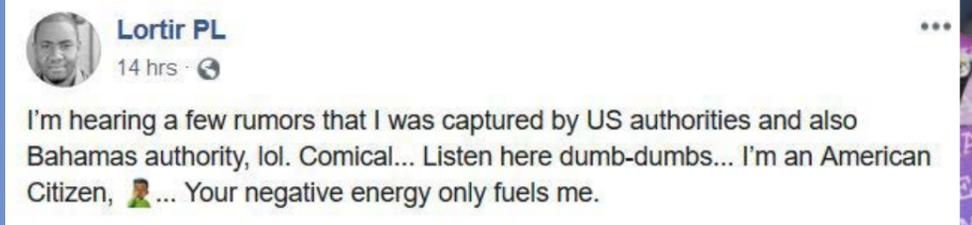

BN Agent, X

If you want to see a real bongie, look no further. Just to let y'all know the guy who went on Facebook threatening the Bahamas was not picked up by US homeland security for making threats. In fact the moron actually has U.S. citizenship as he claims on social media that he is an American citizen.

Talk about being a fool though, I mean who even makes threats to an entire country that's in a crisis on social media, that you know will definitely go viral based on what you say. We won't disturb our readers with the video of this man, but you may be able to run across it on social media. When you do see it, have a good laugh and smile knowing that we The Bahamas are

not the cause of the problems he expressed in anger, WE ARE NOT THE CAUSE.

Also as many has recommended for you to do Mr. "Lortir PL" take a trip to Abaco and help search yourself instead of playing the blame game over missing persons in your family.

WATER SUPPLY LOW ON GRAND BAHAMA!

BN Agent X

Water has ran low on Grand Bahama as supplies into the affected communities are hampered! Potter's Cay Dock here in Nassau, is in CHAOS!

Grand Bahamians are holding on to dear life on the island as water supplies are running low.

Grand Bahamians are in search of the location of the NEMA OFFICE on the island. Most are contacting news companies as to

where they could find assistance.

There is no water supply on Grand Bahama and no official seems to care, HOSPITALS are left waterless and it gets worse. ONLY ONE GAS STATION has reopened making it chaotic with long lines for gas.

We are also being advised that at Potters Cay Dock there is absolute chaos as loved ones are attempting to get supplies on boats to the affected islands like Abaco and Grand

Bahama.

Tons of much-needed supplies are backed up on the dock. One vendor attempted to deliver seven pallets of much-needed drug supplies to a vessel headed into Grand Bahama but found serious difficulties at the dock on Monday. These issues need urgent attention by government! but what are they doing about it? Not a Christ thing!

We have also learnt that, with the BPL power

supply constantly being interrupted in New Providence, some water companies are finding it challenging to keep up with the demand for water. This is URGENT! People need water NOW!

DORIAN EVACUEE ARRESTED IN USA FOR 2013 CRIME

BN Agent, X

Authorities arrested a woman who lives in a Bahamian town ravaged by Hurricane Dorian at Palm Beach International Airport last week after U.S. Customs officials pulled up a 6-year-old car theft warrant.

The Palm Beach County Sheriff's Office said authorities detained Sherrel Terez Roker, 32, on Friday. It's not known if she had been in the Bahamas during Dorian, but the involvement of Customs means she was entering the United States.

PBSO said it did not

know how Roker arrived, saying it got involved only after Customs detained the woman. A PBSO log said Customs told PBSO that Roker had flown in from the Bahamas. PBIA said no airlines flew in from there Friday but people might have taken private planes. A Customs spokesman did not provide information, citing privacy rules.

Roker remained in the Palm Beach County Jail on Wednesday, awaiting transfer to Broward County, where the warrant was filed.

BUSINESS

UNCUT!

Who gives better coverage? and who do you like better? BTC or ALIV?

BTC TO USD TODAY

1 BITCOIN = \$10,143.50 USD

ALIV VS. BTC

BN Agent, X

Aliv won in an online poll regarding which company gave better coverage at present. This shows the awareness level of people when it comes to utility services being provided by Bahamian companies. Needless to say, it shows that our forever loved BTC has to improve in certain sectors to regain traction for some

of its lost customers after the storm. Installation of fibre optic throughout the entire island of New Providence would be a good start as persons would be able to get better connection and give flow tv a try in their homes along with faster internet speeds. BTC is well aware of what needs to be done to establish trust within the entire country, the only question is when will

the investment be made to get it done? Or if Liberty investment, then a new set of shares should be sold for more owners to come in so they can put up the money to improve the infrastructure of the company. Once the upgrade is made, it'll only be a matter of time before customers come running back to good old faithful. Until then Bahamians

are going to spend their money with who they trust can provide them with the best service under any circumstances.

THE TRUTH ABOUT RIGHT NOW IN ABACO!

BN Agent, X
The truth about right now in Abaco, more than a week after the storm and tons of dead bodies still around the country, people not being told how to evacuate, just the worst of the worst.

evacuation in the hands of the officials. The private sector is doing way more in evacuation than our government and NEMA. We need help in Abaco, the death toll by government at current is 50, but people on the ground are saying they are sure its over 1,500+ because the stench of dead bodies when traveling through Marsh Harbor and the mud areas

are overly unbearable. Persons are daily wearing disposable dust masks and others tie rags of clothes around their noses as they travel through those particular towns.

It's only a matter of time before people on the island become ill from inhaling the stench of death all day, the island is in need of proper evacuation and a

proper clean up. Heavy equipment is needed to clear out the rubble and so that professionals can remove the bodies from the piles of dirt.

Many family members have pointed out their dead loved ones in the rubble and to this day they say the bodies are still there, mainly

because it's hard to get to the bodies to remove them.

MASS BURIALS OF PERSONS REPORTED MISSING ON ABACO

BN Agent, X
Mass burials of persons reported missing on Abaco have begun... A truck was loaded with the remains of residents on Abaco that were being recovered Tuesday and taken to be buried in mass graves on Abaco. The bodies were scattered all along the corridors of the communities affected by Hurricane Dorian, which made landfall

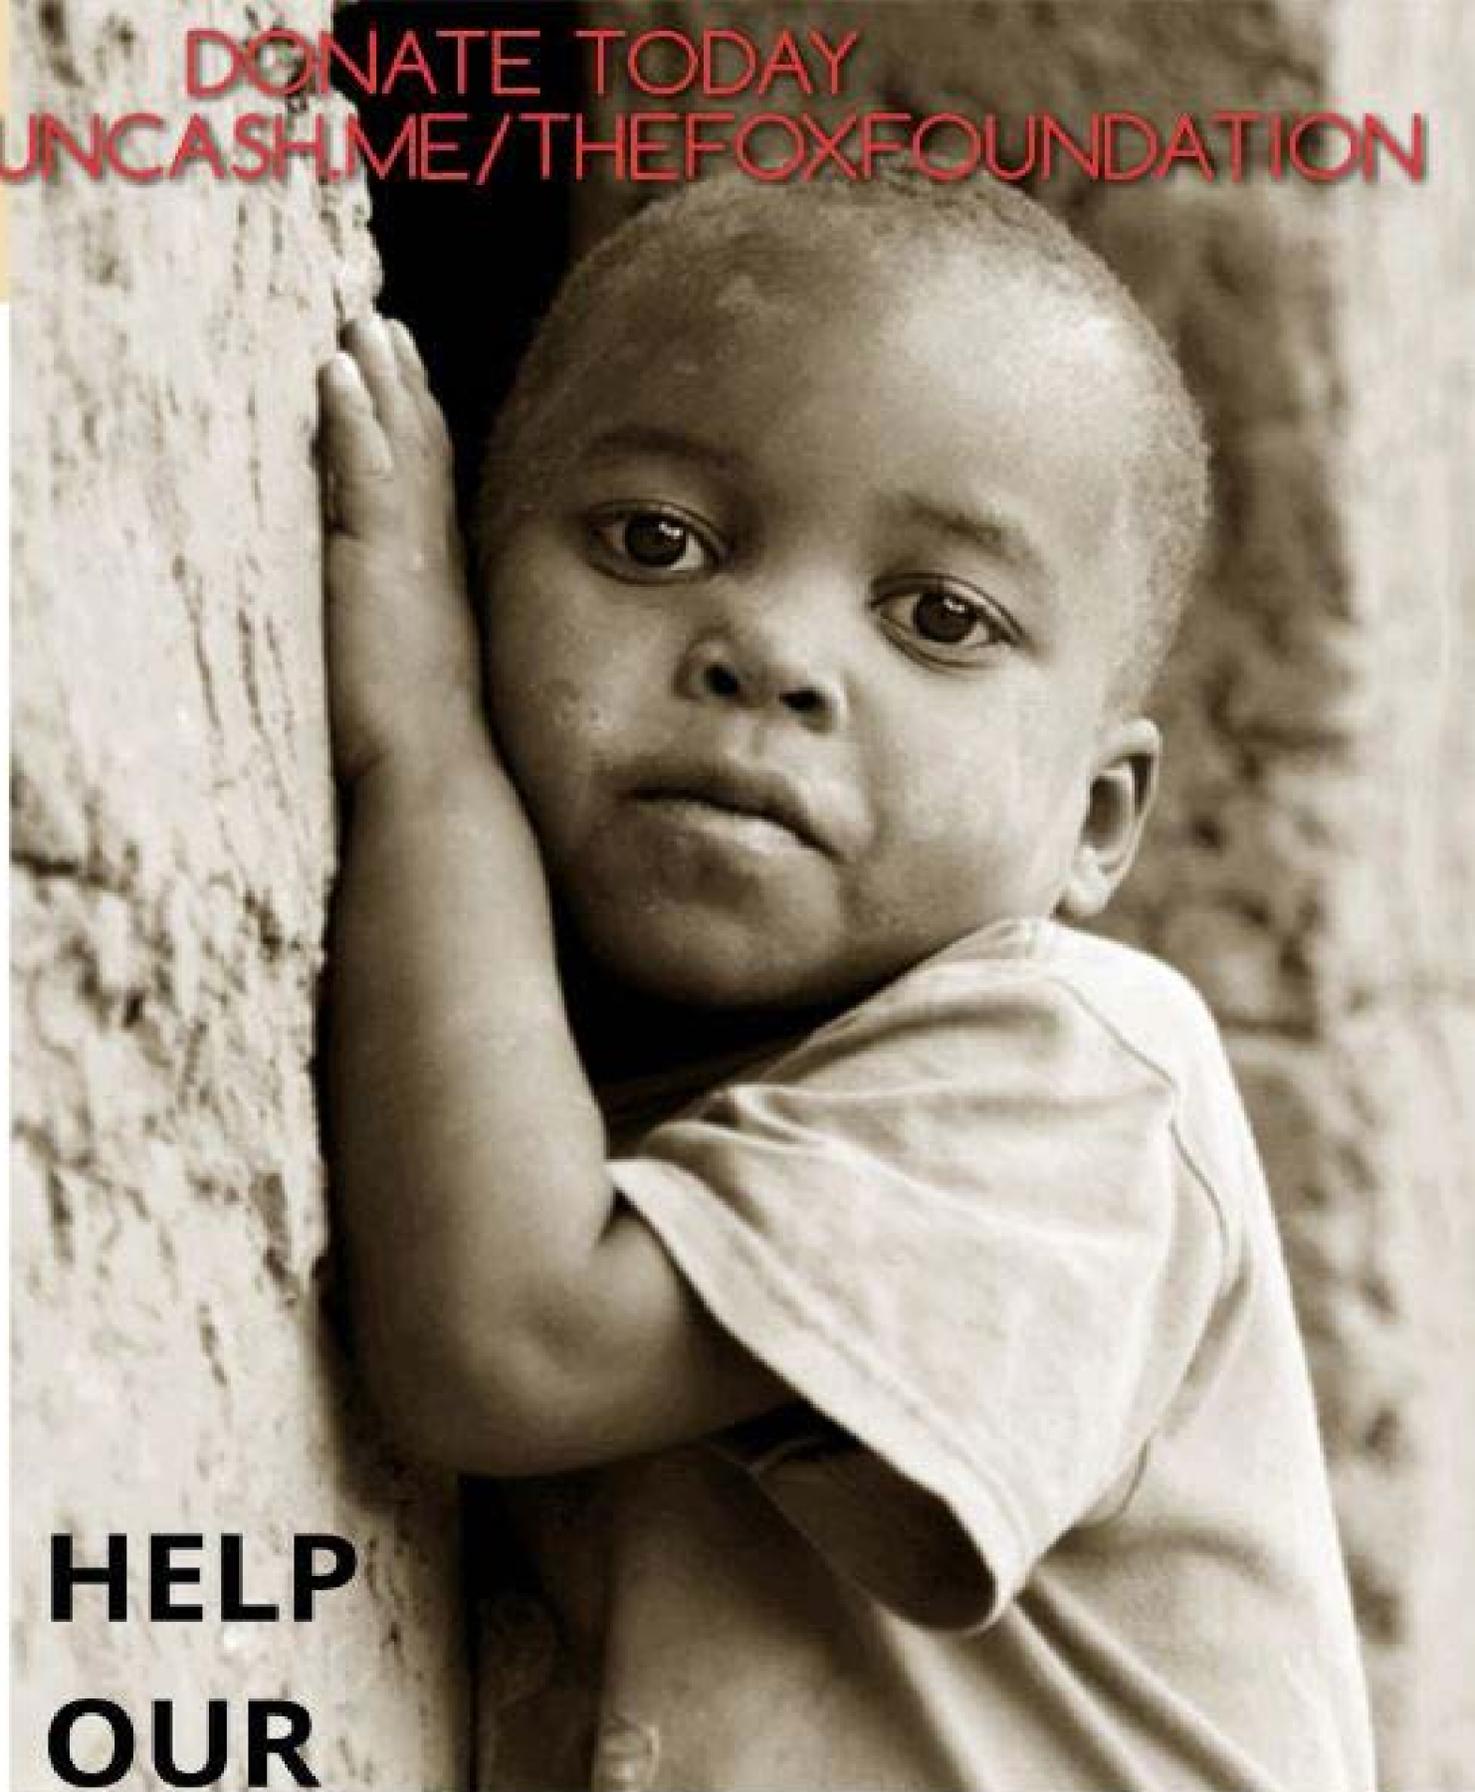

last week packing winds of over 185mph. Many of the remains collected in this photo were that of Haitian Nationals. The bodies were placed in body bags without any funeral services. The Commissioner of Police has advised anyone unable to find their loved ones to file a missing person report. The Commissioner of Police Anthony Ferguson in a statement yesterday confirmed the body count to 43, however, according to

clinicians that number in Abaco alone is around 3,000 following the deadly storm.

MICHAEL JORDAN PLEDGE \$1 MILLION TO THE BAHAMAS

BN Agent, X

Michael Jordan gives 1 million dollars pledge for donation to The Bahamas in Hurricane Dorian Relief. NBA legend Michael Jordan has jumped into the Bahamas relief effort by announcing he will give \$1 million to help the islands impacted by Hurricane Dorian.

"My heart goes out to everyone who is suffering and to those who have lost loved ones."

I am devastated to see the destruction that Hurricane Dorian has brought to the Bahamas, where I own property and visit frequently," Jordan said in a statement from his manager, Estee Portnoy, on Twitter.
